Summary

To utilize my knowledge of machine learning, Python, and data-driven technologies to develop efficient and real-world solutions. I am committed to continuous learning and aim to contribute positively to a dynamic and growth-focused organization, and I have the basic knowledge of the android app using Kotlin.

EDUCATION

B.Tech –	**Computer Science & Engineering (AI & ML)**	**— SGPA : 9.0**
Collage -	**G.H. Raisoni College of Engineering, Nagpur (RTMNU)**	**— CGPA : 8.83**
HSC -	Class XII (Science Stream)	**— 79%**
SSC –	Class X	**— 86%**

TECHNICAL EDUCATION

Pursuing hands-on learning in AI/ML and software development through personal projects, online coursework, and continuous self-improvement to strengthen core concepts and industry readiness.

TECHNICAL SKILL

Programming Languages: **Python** | C | Kotlin | basic SQL

Tools: |Android Studio |**GitHub** |Firebase |**Google Colab** | VS code | **GitHub Copilot**

Development / Libraries: **Deep Learning (ANN, CNN, RNN, Transformer) | Pytorch** | Pandas | NumPy | API Handling | Machine Learning | **NLP** | **RAG** | | **Finetuning** | **Training model** | basic **Gen AI**

EXPERIENCE

Actively seeking internship opportunities **|** Focused on gaining hands-on experience in AI/ML and development **|** Working on self-driven projects to build technical skills and portfolio.

Projects

- **LLM Fine-Tuning Project:** I fine-tuned a pretrained language model on custom instruction-response data to give better, task-specific answers.
- **RAG-based Question Answering System:** I created an AI chatbot that can answer questions from PDFs using RAG. It finds relevant information from the document and uses a language model to generate accurate answers.
- **STUDY Material App: NoteLab** is an Android application designed specifically for college students (GHRCEN) to access organized materials of their academic efficiency and this app full on the production and the app continuously used by GHRCEN campus students. (not public)

CERTIFICATION & ACHIVEMENTS

- Completed Google Cloud Arcade 2025 challenges on Google Cloud Platform.
- Completed Python Programming Certificate from **HackerRank**.

SOFT SKILL

Team collaboration | Quick learner | Problem-solving | Time management | Tech curiosity | Self Leaner

VOLUNTEERING

- **Volunteered with NSS** (National Service Scheme) – actively participated in community.
